

TENDER SOLES FARM

2022 Pre-order Seedling Catalog

**Organic, High-Quality Vegetable,
Herb and Flower Seedlings**

ABOUT OUR SEEDLINGS

We offer healthy, organic plants raised right on our farm in Richmond. We give our seedlings the very best nutrients and growing conditions so that they become strong, productive plants for your garden.

We offer varieties that we have trialed over the years and come to trust on our own farm and do well in our short Maine growing season. We use certified organic compost-based media from Living Acres in New Sharon, ME and non-GMO seed from Maine seed companies: Fedco and Johnny's Selected Seeds, along with a few other seed companies like High Mowing & Seed Savers Exchange.

Our seedlings are certified organic through MOFGA Organic Certification Services. For more information visit: <https://mofgacertification.org/>

Praise from our customers:

- *This will be our fourth year ordering from Tender Soles. Well worth the drive from Boothbay! -Holly Fulmer*
- *Who knew you could grow a real watermelon in Maine? So sweet and yummy.*
- *My tomatoes were absolutely perfect last year and we ended up with an abundance of pasta sauce. We used all the sauce ingredients (garlic, basil, oregano, onions, peppers and of course tomatoes) right from Tender Soles. - Nichole Hall*
- *Tender Soles has excellent hot pepper seedlings! Every year the plants grow up to be very productive, healthy and delicious. - Tracy G*

HOW IT WORKS:

Preordering helps to ensure availability and allows for custom mixing and matching of varieties marked with an asterisk (*). Many pre-order seedlings are grown to order so payment is due upfront. If for some reason we run short on variety that you order, we will inform you of the shortage, offer a substitute if we have one, or your money back.

- *We still take orders for seedlings after the **March 20th** suggested deadline, but ordering earlier helps to ensure that we seed enough of the things we start early, like peppers, onions, and flowers and we are more likely to be able to fill your order.*
1. Please fill out the order form (that is a separate document) with the quantities that you want of each item.
 2. Once we receive your order, we will send a Purchase Order to confirm your order and the total. We recommend that you keep track on a piece of paper/document for your own records.
 3. Please check the box for substitutes if you will accept a substitute if an item is unavailable.
 4. On the order form, select the day that you want to pick-up your seedlings.
 5. You can write us a check and mail it to us: Tender Soles Farm: 453 Main St. Richmond, ME 04357
 6. If you have any questions don't hesitate to email us or call!

Ready-to-plant seedlings will be ready for pick up from our farm in Richmond: You will be able to choose from multiple dates in May to pick up your orders (more info on following page).

Questions?: Kate: (207)620-0030

tendersolesfarm@gmail.com

HOW IT WORKS: CUSTOMERS WITH SNAP (FOOD STAMPS)

Did you know that if you have an **EBT card/SNAP** you can use that to buy vegetable and herb seedlings?

We can also give you your order at 1/2 price!

Contact us for details before or after submitting your order.

Questions?: Kate: (207)620-0030

tendersolesfarm@gmail.com

HOW IT WORKS: CHOOSING PICK-UP DATES

This year we have decided to offer multiple pick-up dates for you to pick-up your seedlings.

- You are welcome to choose multiple pick-up dates for your seedlings, **but please submit separate orders for each pick-up date.**
- For example, if you want to pick up your cold-hearty crops like onions, broccoli, calendula, and mint plants at the beginning of May, you can put in an order for those things and submit the order form.
- Then make a second order for your tomatoes, peppers, cucumbers to be picked up the week of Memorial Day.
- You can pay with one check for multiple orders.

Questions?: Kate: (207)620-0030

tendersolesfarm@gmail.com

CATALOG KEY

- **Days** = Number of days after planting until first harvest
- **O.P.** = 'Open-pollinated' meaning seed can be saved for future seasons and will be true to type if appropriate isolation techniques are used
- **F1 Hybrid** = Traditional (non-GM) breeding methods were used to cross-pollinate two parent varieties selected to pass specific traits to the first generation of offspring. The hybrid offspring may have improved flavor, vigor, disease resistance, etc., but the next generation of seed will not be true to type so saving seed is not recommended.
- **Indeterminate (Ind.)** = Tomatoes that have a vining habit, require some kind of trellising and produce fruit steadily until cold weather hits
- **Determinate (Det.)** = Tomatoes that have a bush habit (some kind of trellising still recommended) and concentrate their fruit set over a shorter period of a few weeks-these varieties are generally great for people that like to can as you get plenty of tomatoes to make up a good batch of sauce at once.
- **Heirloom (HL)** = is an old cultivar of a plant used for food that is grown and maintained by gardeners and farmers, particularly in isolated or ethnic minority communities of the Western world

PLANTING GUIDES FOR YOUR SEEDLINGS

We want you to have a successful season and feel satisfied by the plants you receive from us!

In order to help answer any of your planting, harvesting, or other questions about the specific crops we offer, we will include a Johnny's Selected Seeds catalog for free in each of our customer's orders.

Johnny's Seeds is based here in Maine and offers wonderfully detailed information on the planting, care, and harvest of almost all of the veggies, herbs and flowers that we offer.

*Our farm is in no way affiliated with Johnny's Seeds, and Johnny's Seeds does not compensate us in any way for using their catalog or product.

THE CATALOG

****All of the following photos used with permission from Johnny's Selected Seeds*

BROCCOLI - \$5 PER 6-PACK

Green Magic

57 Days; F1 Hybrid

Early, heat-tolerant variety producing a single large head.

De Cicco

48 Days; Open Pollinated

HL

Delicious multi-cut Italian heirloom. **Pinching the main growth tip is recommended to encourage heavier side shoot production.** Harvest 1-2 times per week to encourage side shoot production.

Baby Broccoli (Broccolini)

Multi- Cut

22 Days; F1 Hybrid

Great for baby broccoli, sweet tender flavor. **Need to harvest 1-2x per week,** plants will bear side shoots for 4-6 weeks. No need to pinch initial main stem.

BRUSSELS SPROUTS - \$5.00 PER 6-PACK

Brussels Sprouts

110 Days; F1 Hybrid

Flavorful, medium-green,
smooth sprouts.

CABBAGE & KOHLRABI- \$5 PER 6-PACK

Omero

73 Days; F1

Red heads are medium sized with dense leaves, good flavor. Their purple color means they are higher in antioxidants. Great for making red sauerkraut!

Tendersweet

Cabbage

71 Days; F1

The name says it all! These flat cabbage are great for fresh eating or light cooking. Their thin sweet leaves are great for coleslaw or wraps.

Farao

65 Days; F1

Delicious, early cabbage. Attractive, deep green 3lb heads. Tender and crisp.

Kalibos

74 Days; Open Pollinated

Red conical cabbage- a delight to grow and eat! Great keepers and have a mild sweetness and crunch. Seeds are from High Mowing seeds, the variety has been improved and stewarded by Fruition Seeds.

CABBAGE - \$5 PER 6-PACK

Minuet

Chinese Cabbage
48 Days; O.P.

A compact plant with heavy heads. Great size: 9'' (not HUGE).

Great for making kimchi or using for cabbage rolls, fresh eating and coleslaw.

Rubicon

Chinese Cabbage
52 Days; F1

Large, 11'' heads are great for fresh eating, and kimchi!

Kohlrabi

43 Days; F1

Although it looks like something from outer space, this relative of broccoli and cabbage will knock your socks off with how delicious it is! Crisp and sweet, they are great eaten fresh or cooked.

CAULIFLOWER - \$5 PER 6-PACK

Bishop

48 Days; O.P.

Great performing cauliflower. 'Self blanches' with its own leaves so you don't have to.

Romanesco

*We are not offering romanesco this year as we have found it does not do well as a spring planted crop. (Best to plant mid to late summer for harvest in fall).

CELERY - \$4.75.00 PER 4-PACK

Tango

80 Days; O.P.

Great performing organic celery. It will be a bit more fibrous and flavorful than the watery stuff from the grocery store.

SWISS CHARD & COLLARDS - \$5 PER 6-PACK

Bright Lights

55 Days; O.P.

Beautiful range of colors!
Pick individual leaves off
the plants for greens all
summer long.

Champion Collards

70 Days; O.P.

Large sturdy productive
blue-green plants. Improved
Vates type. Plants are less
susceptible to cabbage worms
than kales and broccoli due
to their waxy leaves. Very
nutritious. 24-36'' tall.

CUCUMBERS - \$3.50 PER 2'' POT. (2 PLANTS PER POT)

H-19 Little Leaf

57 days; O.P.

Good disease resistance and stress tolerance—these did great for us even with dry weather. 3-5'' fruits pickle well and taste great fresh, no bitterness.

Northern Pickling

48 Days; O.P.

Early, old favorite that was developed in Maine.

***We have found this to be quite bitter when underwatered—we suggest choosing a different variety if you have had issues with bitterness.

Cool Customer

55 days; O.P.

Bred by breeders in Maine at Johnny's Seeds, holds up well to rigors of organic gardens. 4-5'' fruits on productive plants that hold up well to disease and heat.

CUCUMBERS - \$3.50 PER 2'' POT. (2 PLANTS PER POT)

Diva

58 Days; O.P.

Delicious, sweet and bitter free! Thin-skinned slicing cucumber.

Mexican Sour Gherkin

67 Days; O.P.

Specialty 1'' cucumber looks like a watermelon and tastes like a tangy cucumber. Fun for kids!

MarketMore 76

48 days; O.P.

Delicious slicing cucumber with a long harvest window.

Suyo Long

61 days; O.P.

Traditional long fruited variety from China. Sweet, ribbed fruit growing up to 15'' long. Bitter free. Great fresh or as bread and butter pickles.

EGGPLANT - \$6.00 PER 4-PACK; \$2.50 PER 2'' POT

Galine

465 Days; F1 Hybrid

Dearly, productive Italian type with firm, bell-shaped fruits.

Patio Baby

50 Days; F1 Hybrid

Delicious mini eggplants. Best variety for containers, but also does well in the garden. 18-24'' plants. 2-3'' fruits.

Orient Express

58 Days; F1 Hybrid

Very early asian type. Productive and delicious—great grilled!

Fairy Tale

60 Days; F1 Hybrid

Purple and white mini eggplant. Beautiful 2-4'' fruit on compact 18-24'' plants. Delicious with no bitterness and few seeds.

KALE- \$5 PER 6-PACK

Winterbor

55 Days; F1 Hybrid

One of the most cold-hardy kales. Delicious and nutritious.

Tuscano Lacinato

65 Days; O.P. HL

Sturdy Italian heirloom with a soft texture that makes it great for kale salad.

Red Russian

50 Days; O.P.

A more tender kale with purple stems and green flat leaves.

Mixed 6-Pack of Kale

A mix of all 3 varieties.

LETTUCE HEADS - \$5 PER 6-PACK (MIX OF ALL 4 ALSO AVAILABLE)

Romaine

48 Days; O.P.

Harvest a bit earlier if you just want the big main leaves or leave for the full grow time for heads with a nice romaine heart! One-cut harvest.

Green Butterhead: Adriana

48 Days; O.P.

Good flavor, big dense heads, good disease resistance. One-cut harvest. (not for multiple harvest)

Summer Crisp: Muir

50 Days; O.P.

The most heat-tolerant of lettuce! Slow to bolt. One-cut harvest.

Red Butterhead: Skyphos

48 Days; O.P.

Beautiful, big heads! Great flavor, nice and buttery. One cut harvest (not for multiple harvests).

MELONS - \$4 PER 2'' POT - 2 PLANTS PER POT

Cantaloupe: Sarah's Choice

76 Days; F1 Hybrid

Johnny's Seeds says this is their most flavorful cantaloupe. Sweet and juicy. 3 pound size.

Watermelon: Mini Love

70 Day; F1 Hybrid

Personal-sized, early, and delicious fruits average 3-5 pounds. Sweet red flesh.

ONIONS & LEEKS - \$5 PER 3'' POT, 15 PLANTS PER POT

Yellow Storage Onion

104 Days; F1 Hybrid

Reliable, medium-large yellow onion, very long storage potential.

Leek

100 Days; F1 Hybrid

Low maintenance leek with good flavor.

Red Storage Onion

118 Days; F1 Hybrid

Beautiful, medium-sized onion with very long storage potential.

Fresh, Sweet Onions: Ailsa Craig

110 Days; O.P.

Large, mild onion. Use fresh or for short-term storage.

SWEET PEPPERS - \$7 PER 4 PACK - \$2.50 PER 2'' POT

Ace

50 Days Green, 70 Days Red; F1 Hybrid

Early, productive bell. Does well here in Maine with a short growing season. Pick while still green for green bell peppers.

Sweet Sunrise*

65 Days Green, 85 Days Yellow; F1 Hybrid

Delicious pepper that ripens early for our short growing season here in Maine. Pick while still green for green bell peppers.

*Bred in Maine by Johnny's Seeds

Islander

56 days purple, 81 days Red

Beautiful pepper that gives you a 'pop' of color early. Harvest while still purple or wait till it reddens.

Yankee Bell*

60 Days Green, 80 Days Yellow; O.P.

Delicious open-pollinated bell pepper that ripens early for our short growing season here in Maine. Pick while still green for green bell peppers.

*Bred in Maine by Johnny's Seeds

SWEET PEPPERS - \$7 PER 4 PACK - \$2.50 PER 2'' POT

Carmen*

60 Days Green, 80 Days Red Ripe; F1 Hybrid

Sweet Italian 'Bull's Horn' type. Our favorite sweet pepper! Best tasting for frying as well. Avg 6'' long.

*Bred in Maine by Johnny's Seeds

Aura

53 Days Green, 73 Days Yellow Ripe; F1 Hybrid

Delicious 4-5'' long Italian sweet pepper, nice thick walls.

Cornito Rosso*

55 Days Green, 80 Days Red Ripe; F1 Hybrid

A very sweet, Red Italian mini 'bull's horn' type. Similar to Carmen but smaller and a bit more productive. Great fresh and grilled. Average 5'' long.

*Bred in Maine by Johnny's Seeds

Lunchbox Red

55 Days Green, 75 Days Red Ripe; O.P.

Delicious, sweet, mini 2'' snacking pepper! Kids love them.

SWEET PEPPERS - \$8 PER 4 PACK, \$2.50 PER 2'' POT

Round of Hungary

55 Days Green, 75 Red Ripe; O.P. HL

Delicious, thick walled, and sweet. Great for stuffed peppers, and fresh for snacking. Specialty pimento cheese pepper.

Banana Pepper

63 Days Yellow, 80 Red; Hybrid F1

Sweet banana pepper for pickling or fresh eating.

Antohi Romanian

65 Days Yellow, 78 Days Red; O.P. HL

A 4'' heirloom sweet pepper from Romania, these are sweet and prolific! Peppers turn from light yellow, to orange, to red. Great for stuffing and roasting.

Shishito

60 Days Green, 80 Days Red; F1 Hybrid

These thin-walled crispy peppers are delicious fried in hot oil and then sprinkled with salt (and parmesan cheese!) Also in salads and stir fries.

HOT PEPPERS - \$8 PER 4 PACK, \$2.50 PER 2'' POT

Cayenne*

55 Days Green, 75 Days Red Ripe; O.P.

A great thin walled sweet and spicy pepper fresh or dried.

*Bred here in Maine by Rob Johnston at Johnny's Seeds

Jalapeno

67 Days Green, 90 Days Red; F1 Hybrid

Classic jalapeno for stuffing, salsa, and pickling.

Amazing 2

75 Days Green, 95 Days Red Ripe; F1 Hybrid

Korean cayenne, great for drying and grinding into red chile powder (this is the pepper we use in our kimchi). Thick walls.

Hungarian Hot Wax

58 Days Yellow, 83 Days Red; O.P.

Ripens yellow to orange to red, 5.5''x1.5'' pepper. Great for stuffing, frying and pickling. Thick walls.

HOT PEPPERS - \$8 PER 4 PACK, \$2.50 PER 2'' POT

Habanero

67 Days Green, 87 Days Orange Ripe; F1 Hybrid

Beautiful HOT pepper, earlier maturing than other varieties for northern climates.

Poblano: Bastan

65 Days Green, 85 Days Red; O.P.

Earlier than other poblanos, which makes it great for our short growing season. 5'' long fruits are great for stuffing-chile rellenos!

Ghost Pepper: Bhut Jolokia Red*

110 Days

One of the world's hottest peppers! 1,000,000 scoville units! Be careful handling fruits.

ZUCCHINI - \$3.50 PER 2'' POT (2 PLANTS PER POT, PLANT AS A MOUND)

Costata Romanesco

52 Days; O.P. HL

Italian heirloom zucchini—our favorite zucchini. It is a little lower yielding but the flavor is delicious.

Dunja

47 Days; F1 Hybrid

Early and good producer— with powdery mildew disease resistance.

Golden Glory

50 Days; F1 Hybrid

Spineless yellow zucchini. Plants have few spines and an open growth making harvest easier.

SUMMER SQUASH \$3.50 PER 2'' POT (2 PLANTS PER POT, PLANT AS A MOUND)

Zephyr

54 Days; F1 Hybrid

Beautiful yellow/green squash, delicious when picked young (3-6'').

MultiPik

50 Days; F1 Hybrid

Yellow early straightneck summer squash. We find this one tends to stay more tender at a larger size than other varieties.

Yellow Crookneck

58 days; O.P. HL

Traditional variety well known for its buttery flavor and texture. Can get mealy if left to grow too big, pick when fruit is 3-6''.

Juan et Verte

50 Days; O.P.

Adorable and delicious patty pan! Perfect for stuffing.

WINTER SQUASH - \$3.50 PER 2'' POT (2 PLANTS PER POT, PLANT AS A MOUND)

TipTop PMR Acorn

92 Days; O.P.

More flavorful acorn than others this size. Plant habit is semibush. Intermediate resistance to powdery mildew. Averages 5 fruits per plant.

Delicata

100 Days; O.P.

Developed in Maine by Johnny's seeds, this is one of the sweetest squash, great for baking right at maturity—no need to let sit for it to sweeten.

BonBon Buttercup

95 Day- F1 Hybrid

Delicious, one of our favorite types of squash. 4-5lb squash has a sweet dry flesh. Best eaten a few weeks-month after harvest as it sweetens with time.

Spaghetti Squash

88 Days; O.P.

Medium sized squash with pasta-like consistency when cooked. Great pasta alternative. Slightly sweet nutty flavor.

WINTER SQUASH - \$3.50 PER 2'' POT (2 PLANTS PER POT)

Waltham Butternut

105 Days; O.P.

The standard open pollinated butternut. Stores for months! Large fruits with a sweet flavor that gets sweeter after a few weeks in storage. Stores 3-4 months.

Butterbaby

100 Days; Hybrid F1

A new mini butternut! A great 'personal' size squash, with great flavor. 4-6'' long fruits. Stores 3-4 months. Avg. yield 10-12 fruits per plant.

Sunshine Kabocha

95 Days; O.P.

Flesh is sweet and dry, great for baking, soups, and pies. Fruit gets sweeter after a few weeks of storage.

Black Futsu

105 Days; O.P.

A beloved Japanese delicacy. A bumpy relative of the butternut family, this unique squash is delicious, and thin skinned, no need to peel. Keeps 3-4 months. Avg 2-4lbs

WINTER SQUASH - \$3.50 PER 2'' POT (2 PLANTS PER POT)

Blue Hubbard

100 Days; O.P.

Homestead favorite!
Delicious dry flesh. Avg
12-15lb. Hard blue green
shell can be hard to crack,
my parents use an axe! Good
keeper.

Blue Ballet Hubbard

95 Days; O.P.

Flesh is sweeter than the
traditional hubbard, and
fruits are smaller: 4-6
pounds. Similar beautiful
blue gray appearance.

PUMPKINS - \$3.50 PER 2'' POT (2 PLANTS PER POT)

Racer

85 Days; F1 Hybrid

A great jack-o-lantern pumpkin, bred here in Maine. Averages 2-3 fruits per plant, 12-16 pounds.

Casperita

77 Days; F1 Hybrid

Mini ½-1 pound white pumpkins—beautiful for fall decorating. Average 15 fruits per plant.

Wee-Be-Little Pumpkin

95 Days; O.P.

Tiny, round pumpkins, about the size of baseball. Smooth skin is great for painting. Average 8 fruits per plant.

Atlantic Giant

110 Days; O.P.

These pumpkins can get BIG under good growing conditions (lots of fertilizer and water) 50-125 lb. Orange-pink color and light ribbing. Average 1-2 fruits per plant.

PUMPKINS - \$3.50 PER 2'' POT (2 PLANTS PER POT)

New England Pie Pumpkin

90 Days; O.P. HL

The classic, heirloom, pie pumpkin. Stringless sweet flesh with high dry matter. Also great for small Jack-o-lanterns.

Cinderella or Rouge Vif D'Etampes

115 Days; O.P. HL

Beautiful French heirloom, great for fall decoration and also makes a delicious pie pumpkin. 10-15 pounds. Average 2 fruits per plant.

Winter Luxury Pie Pumpkin

105 Days; O.P.

Beautiful unique netted skin. Very good dry flesh for baking.

GOURDS - \$3.50 PER 2'' POT (2 PLANTS PER POT)

Autumn Wings Blend

95 Days; O.P.

A wide array of winged and warty gourds. Average 8-12 ounces.

Very similar to Gremlins Gourds.

Birdhouse Gourd

95 Days; O.P.

Large pearshaped 10'' fruit with smooth skin and can be dried to make birdhouses for certain birds like bluebirds and wrens! Harvest and let dry for several months. Clean outside with bleach before boring hole.

Gremlins

95 Days; O.P.

**Seed Not Available
This Year**

Gourds in lots of fun shapes and colors! Average 5-7'' with various smooth or warty skin. Average 2-3 fruits per plant.

RADICCHIO: \$5 PER 4-PACK

Bel Fiore

52 Days; O.P.

‘Beautiful Flower’ in Italian, this slightly bitter green is beloved for its flavor and crunch. Harvest when head is full but loose, like butterhead lettuce.

TOMATILLOS AND HUSK CHERRIES - \$8 PER 4-PACK

Husk Cherry

75 Days; O.P.

Delicious, tropical flavored fruits sit inside a thin husk. Kids love them! (and so do we).

Tomatillo: Toma Verde

60 Days; O.P.

Large fruits on big plants!
Used in salsa verde and classic salsas.

TOMATOES: HEIRLOOMS - \$8 PER 4-PACK, \$2.50 PER 2'' POT (SINGLE)

Brandywine

78 Days; O.P. HL
Indeterminate

Beautiful rich meaty fruit have a wonderfully balanced flavor, sweet and tart. This 'quicenberry' strain is considered one of the best. Potato leaf plants grow large fruits, some over 1lb.

German Johnson

75 Days; O.P. HL
Indeterminate

More vigorous, higher yielding than Brandywine type. 8-16 ounce fruits, are not quite as delicious as Brandywine but make up for it in numbers.

Cherokee Purple

72 Days; O.P. HL
Indeterminate

8-12 ounce fruits, purply pink with dark shoulders. Swirls of green, brown and red on the interior. Smoky rich flavor.

Black Krim

80 Days; O.P. HL
Indeterminate

A delicious Russian heirloom. Rich, smoky flavor and smooth texture. 8-16 ounce purple tomatoes with brown/green shoulders. A higher yielding heirloom.

TOMATOES: HEIRLOOMS - \$8 PER 4-PACK, \$2.50 PER 2" POT (SINGLE)

Striped German

78 Days; O.P. HL
Indeterminate

Gorgeous fruit! Vibrant yellow fruit with external and internal swirls of pink and red. 12 ounce fruits. Less acidic than most red tomatoes.

Green Zebra

72 Days; O.P.
Indeterminate

Though not technically an heirloom, this fruit is open pollinated and looks like one! Golden green fruits with dark green stripes are tangy and sweet. 3-4oz.

Paul Robeson

78 Days; O.P. HL
Indeterminate

Beautiful rose-brown fruits and deeply rich flavor. This tomato was named after Paul Robeson who was a famous African-American opera singer, linguist, athlete and civil rights champion.

PASTE/SAUCE HEIRLOOM TOMATOES - \$8 PER 4-PACK, \$2.50 PER 2" POT (SINGLE)

Amish Paste

85 Days; O.P. HL
Indeterminate

Classic 8-12 ounce heirloom paste tomato. Great for sauces, canning, and fresh.

Blue Beech

82 Days; O.P. HL

This will be our first year growing this heirloom variety but we are excited to share it with you as it looks productive and delicious. 'Sausage' type, 8-10 ounce fruit.

Speckled Roman

85 Days; O.P. HL
Indeterminate

6-8 ounce sauce tomato with beautiful golden stripes. Very meaty, thick flesh with little juice—great fresh and cooked!

HYBRID SLICING TOMATOES - \$2.50 PER 2'' POT (SINGLE PLANTS ONLY)

Estiva

70 Days; F1 Hybrid
Indeterminate

7-9 ounce red slicer that is less likely to crack! Great flavor and a top producer.

Valley Girl

65 Days; F1 Hybrid
Determinate

Very productive early slicer. Good flavor and crack less than others. Sets fruit under heat or cold stress. 7-8 ounce fruits.

New Girl

62 Days; F1 Hybrid
Indeterminate

A delicious early tomato. 4-6 ounce fruits with better flavor and more disease resistance than Early Girl— from the same breeder.

Defiant

65 Days; F1 Hybrid
Determinate

A delicious tomato with late and early blight disease resistance. 6-8 ounce fruits.

HYBRID SLICING TOMATOES - \$2.50 PER 2" POT (SINGLE PLANTS ONLY)

BHN 871

74 Day; F1 Hybrid
Determinate

A delicious golden orange tomato on a determinate plant. Good disease resistance and like other non-red tomatoes they have less acid. 10-12 oz fruit.

Martha Washington

78 Days; F1 Hybrid
Indeterminate

This beautiful pink slicer provides the heirloom flavor and richness but on a more productive and disease resistant plant. 8-12 oz fruit.

CHERRY TOMATOES - \$8 PER 4-PACK, \$2.50 PER 2'' POT (SINGLE)

Sungold

60 Days; F1 Hybrid
Indeterminate

Our favorite cherry tomato. Very sweet and satisfying. A very vigorous plant. Fruits tend to crack easily but all is forgiven in flavor.

Black Cherry

64 Days; O.P.

Beautiful dark purple to brown fruits. Good producer. They are a bit late to start to ripen but worth the wait! They look gorgeous mixed with other colorful cherries for salads.

Supersweet 100

60 Days; F1 Hybrid
Indeterminate

I have been growing sweet 100s since I was a kid! Still one of our favorites. Reliable and delicious, they grow on very satisfyingly large clusters.

White Cherry

59 Days; O.P.

Pale yellow fruits with sweet, low acid flavor. We grew these for the first time 2 years ago and were amazed! They may have even replaced sungold as our farm favorite for flavor.

CHERRY TOMATOES (CONTINUED) - \$8 PER 4-PACK, \$2.50 PER 2" POT (SINGLE)

Sunrise Bumble Bee

60 Days; F1 Hybrid
Indeterminate

Yellow cherry with red and pink stripes. As delicious as it is beautiful! Impress your friends and family with these very unique and delicious fruits.

Tidy Treats

60 Days; F1 Hybrid
Dwarf Indeterminate

A dwarf indeterminate cherry tomato! Great for pots and small spaces. A good producer and delicious. A single standard tomato cage will keep it in check.

Indigo Cherry Drop

71 Days; O.P.
Indeterminate

The most unique cherry tomato that we grow—mahogany reddish brown shoulders, ripens to a bright orange at the flower end.

Cherry Tomato Farmers' Choice Mix

A mix of 4 different varieties of cherry tomatoes. Each will include 1 red cherry, 1 sun gold, plus 2 other 'surprise' cherry varieties.

GRAPE TOMATOES - \$7 PER 4-PACK, \$2.50 PER 2'' POT (SINGLE)

Red Pearl

60 Days; F1 Hybrid
Indeterminate

We love this grape tomato because it is delicious and also has a great meaty texture. Very satisfying. Resistant to late blight and resists cracking.

Pink Tiger

70 Days; O.P.
Indeterminate

Gorgeous large grape tomato, could almost be called a plum. Meaty and sweet. Makes a delicious sauce roasted with garlic.

GARLIC - \$5/HALF POUND. CERTIFIED DISEASE FREE

Seed Garlic:

In Maine, garlic is planted in the fall - generally around Halloween, before the ground freezes, and is harvested in July the following year.

Unlike your seedlings that are ready to plant in the spring, your seed garlic will be ready for you to pick up in early October.

Our garlic is tested at the Maine Cooperative Extension to be free of disease.

Red Russian: Hard Neck

A delicious variety with beautiful interior wine-stained papery skin. 5-10 cloves per head. Pick flowering scapes in late spring and use as you would fresh garlic. 4-6 Heads per half pound.

German White: Hard Neck

We love this variety as it has very large cloves, great for chefs and people that use a lot of garlic= less peeling! 3-6 large cloves per head. Edible flowering scapes. 4-6 heads per half pound

Inchellium: Softneck

We have had great success overwintering this variety. It is delicious and spicy with many small cloves. Best for making garlic braids. Does not form scapes/flowers. 4-6 heads per half pound.

BASIL - \$5 PER 4-PACK (2-3 PLANTS PER CELL, PLANT AS A BUNCH)

Genovese

58 Days; O.P.

Classic Italian pesto basil— nice large leaves. Delicious for a garnish: Pizza, caprese, salad, lasagna!

Sweet Thai

64 Days; O.P.

Delicious thai basil with spicy anise flavor for cooking or used fresh. Beautiful purple flowers.

Eleonora

55 Days; O.P.

Genovese type bred for intermediate resistance to downy mildew. Delicious flavor with disease resistance.

Purple Basil

70 Days; O.P.

Beautiful basil, with spicy basil flavor. Makes a beautiful garnish or used for cut flower bouquets!

BASIL - \$5 PER 4-PACK (2-3 PLANTS PER CELL, CAN PLANT AS A BUNCH)

Tulsi/Holy Basil
